URANIUM EXPLORATION PERMIT

Pursuant to SDCL 45-6D

Name of Operator

POWERTECH (USA) INC.

Address of Operator's
Principle Place of Business:

5575 DTC PARKWAY, STE. 140
GREENWOOD VILLAGE, CO 80111

Name and Address of Operator's Resident
Agent in South Dakota:

CT CORPORATION SYSTEMS
319 COTEAU STREET
PIERRE, SD 57750

Telephone Number:

(303) 790-7528

Telephone Number:

(605) 224-5825

Brief Description of the Type of Uranium Exploration to be Conducted (include a complete description of methods and a list of other minerals to be explored):

Permission is sought to drill 30 exploration and condemnation holes into the Inyan Kara formation. Condemnation holes are necessary to assure that planned surface facilities are not located over ore deposits. The holes will be rotary drilled by a rubber-tired drill rig to an average depth of 500 feet (300 to 800 ft). The holes will be radiometrically logged for uranium and vanadium. Each drill site will consist of an excavated mud pit with approximate dimensions of 12 ft X 12 ft X 12 ft., and minimal surface disturbance by the drill rig and ancillary vehicles (logging truck, water truck, backhoe and geologist's pickup). No roads will be constructed. Sites will be accessed from existing roads or driving short distance across existing ground surface. Drill sites will not be accessed if the surface is muddy and vehicles are likely to become stuck.

Date Exploration Will Commence:

September 2008 or earlier, depending on issuance of permit

Legal Description of Land to be Explored by Section, Township, and Range:

SW1/4 Section 29, SE1/4 Section 30 and NW1/4 Section 32; T6S-R1E, Custer County
SW1/4 Section 2, NE1/4 Section 10, and NW1/4SE1/4 and NE1/4SW1/4 Section 11;
T7S-R1E, Fall River County

County:

Custer and Fall River

What Legal Authority Does the Operator Have to Conduct Exploration on the Above-Described Land?

☐ Deed ☒ Lease ☐ US Forest Service Permit ☐ Pending US Forest Service Permit
☒ Other Claims

Attach Copy if Available

INSTRUCTIONS (Reference SDCL 45-6D):

This Application Must be Accompanied by:

1. A Plan of Reclamation Pursuant to Section 9.
2. A Topographic Map Pursuant to Section 10.
3. A Fee of \$500 Pursuant to Section 18.
4. Any Written Landowner Consultations Giving Alternative Preferences for the Reclamation of the Affected Land Pursuant to Section 16.

Before a Hearing on the Permit May be Conducted by the SD Board of Minerals and Environment, the Applicant Must Submit the Following Materials:

1. A Copy of the Affidavit of Publication of Notice Pursuant to Section 12.
2. Proof of Filing a Copy of the Application with the Register of Deeds Pursuant to Section 11.
3. A Surety in an Amount to be Determined by the Department Pursuant to Section 19.

Applicant hereby affirms that the uranium exploration will be conducted pursuant to the terms and conditions of the approved permit; that he will grant access to the SD Board of Minerals and Environment or its agents to the area under application from the date of application and thereafter for such a time as is necessary to assure compliance with all provisions of SDCL 45-6D or any rule, order, or decision promulgated hereunder.

I declare and affirm under the penalties of perjury that this claim (petition, application, information) has been examined by me, and to the best of my knowledge and belief, is in all things true and correct.

STATE OF SOUTH DAKOTA
BEFORE THE SECRETARY OF
THE DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES

IN THE MATTER OF THE)
APPLICATION OF POWERTECH (USA) INC.) CERTIFICATION OF
APPLICANT

STATE OF COLORADO)
) SS
COUNTY OF ARAPAHOE)

I, POWERTECH (USA) INC., the applicant in the above matter after being duly sworn upon oath hereby certify the following information in regard to this application:

South Dakota Codified Laws Section 1-40-27 provides:

"The secretary may reject an application for any permit filed pursuant to Titles 34A or 45, including any application by any concentrated swine feeding operation for authorization to operate under a general permit, upon making a specific finding that:

(1) The applicant is unsuited or unqualified to perform the obligations of a permit holder based upon a finding that the applicant, any officer, director, partner, or resident general manager of the facility for which application has been made:

- (a) Has intentionally misrepresented a material fact in applying for a permit;*
- (b) Has been convicted of a felony or other crime of moral turpitude;*
- (c) Has habitually and intentionally violated environmental laws of any state or the United States which have caused significant and material environmental damage;*
- (d) Has had any permit revoked under the environmental laws of any state or the United States;*
- (e) Has otherwise demonstrated through clear and convincing evidence of previous actions that the applicant lacks the necessary good character and competency to reliably carry out the obligations imposed by law upon the permit holder; or*

(2) The application substantially duplicates an application by the same applicant denied within the past five years which denial has not been reversed by a court of competent jurisdiction. Nothing in this subdivision may be construed to prohibit an applicant from submitting a new application for a permit previously denied, if the new application represents a good faith attempt by the applicant to correct the deficiencies that served as the basis for the denial in the original application.

All applications filed pursuant to Titles 34A and 45 shall include a certification, sworn to under oath and signed by the applicant, that he is not disqualified by reason of this section from obtaining a permit. In the absence of evidence to the contrary, that certification shall constitute a prima facie showing of the suitability and qualification of the applicant. If at any point in the application review recommendation, or hearing process, the secretary finds the applicant has intentionally made any material misrepresentation of fact in regard to this certification, consideration of the application may be suspended and the application may be rejected as provided for under this section.

Applications rejected pursuant to this section constitute final agency action upon that application and may be appealed to circuit court as provided for under chapter 1-26."

Pursuant to SDCL 1-40-27, I certify that I have read the forgoing provision of state law, and that I am not disqualified by reason of that provision from obtaining the permit for which application has been made.

I declare and affirm under the penalties of perjury that this claim (petition, application, information) has been examined by me, and to the best of my knowledge and belief, is in all things true and correct.

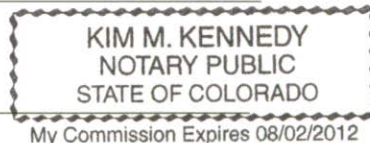

Dated this 28th day of August, 2008.

EXPLORATION RECLAMATION PLAN

Pursuant to SDCL 45-6C-8 and 45-6D-9

RECEIVED
AUG 29 2008
MINERALS & MINING PROGRAM

In preparing this Reclamation Plan, please address each item in detail, following SDCL 45-6C-8 and 45-6D-9. Also, refer to the reclamation standards outlined under SDCL 45-6C-27 through 45-6C-34, SDCL 45-6D-33 through 45-6D-39, and the state's hole plugging regulations as detailed under ARSD 74:11.

- 1.) Describe the type of reclamation the operator proposes to achieve in the reclamation of the affected land.

The type of reclamation plan purposed by Powertech is to reclaim effected land surface to original conditions or as near to original conditions as possible. The intent of the reclamation proposed is to allow, to the maximum extent possible, agriculture, recreation or future resource development pursuant to the requirements of SDCL 45-6D and ARSD 74:11. Drill hole reclamation will include, separation of topsoil from underlying soils when digging each 12x12x12 mud pit for each hole. Upon completion of drilling and logging, each mud pit will be allowed to dry and then backfilled. Topsoil will be replaced and area re-seeded. Existing roads will be utilized for access to each site; where driving on present surface cannot be avoided, surface will be leveled off to a smooth horizontal seeded and back-dragged via a backhoe to aid in seed cover.

All solid waste materials such as paper, plastic, wood and other debris will be removed from the location and disposed of in facilities approved for disposal of such waste.

- 2.) Provide a proposed timetable for seeding and replanting indicating when and how the reclamation plan will be implemented. Such timetable shall be developed after consulting with the County District Conservationist as to the nature of the soils and native vegetation in the area of the proposed operation. These recommendations shall be followed, if any are provided, and copies of all correspondence shall be provided to the Department.

Activity	Time Frame	Procedure	Equipment/ Material(s)
Mud pit allowed to dry	For 1-2wks upon completion of drilling and logging	Mud pit allowed to sit undisturbed	None required
Backfill dry mud pit	1-2wks after completion of drilling and logging	A backhoe will move the previously separated soils into the pit; topsoil will be re-placed over pit.	Backhoe original soils and topsoil specific to mud pit.
Level and seed mud pit area	~ 3 months subsequent to completion of drilling and logging (mid to late Fall or following Spring)*	Backhoe will be used to level effected area. Seed will be broadcasted over affected area and lightly back-dragged with a backhoe.	Backhoe and seed mixture suitable to for the majority of soils in the areas of proposed drilling, recommended by the Fall River County NRCS representative, Mr. Kroy Bossert:
			Western Wheatgrass 6.0 lbs/acre
			Green Needle Grass 3.0 lbs/acre
			Blue Grama 0.6 lbs/acre
			Sideoats Grama 1.8 lbs/acre

*Dependent upon time of authorization to drill and when drilling is completed; some drill locations may not be reclaimed before winter sets in, therefore, reclamation will resume the following spring.

- 3.) Describe how the reclamation plan will rehabilitate the affected land.

The reclamation plan will rehabilitate the affected land in the following manner:

- Retention of all drilling mud and cuttings in a relatively small confined space minimizes surface impact
- Separating and replacing topsoil on the mud pits assists in assuring successful re-vegetation and restoration of the affected land
- Utilizing a seed mixture recommended by the local soil conservation specialist optimizes re-vegetation efforts.
- The items above and the reclamation plan as a whole provides for soil stability, minimal erosion and protection of water resources in just a couple of growing seasons.

- 4.) Describe the anticipated temporary and permanent plugging and capping procedures to be used (refer to SDCL 45-6C-28 through 45-6C-30, SDCL 45-6D-33 through 45-6D-35, and the state's hole plugging regulations as detailed under ARSD 74:11).

All drill holes will be drilled, at an average depth of approximately 500 feet, into the Inyan Kara formation (Fall River and Lakota units). These are confined aquifers. If artesian conditions are encountered in a drill hole, drilling mud will be thickened to stop the water flow during drilling and logging. After logging the hole will be plugged with high sulfate-resistant cement to within 3 feet of the ground level according to ARSD 74:11:08:07, then the upper 3 feet of the drill hole will be filled with topsoil.

Any non-flowing artesian test holes will be plugged in accordance with ARSD 74:11:08:05.

Temporary capping of drill holes is not anticipated, however, should it be necessary, Powertech will adhere to the requirement specified in ARSD 74:11:08:08, according to SDCL 45-6D-33.

- 5.) Provide the estimated cost of: a) implementing and completing the proposed reclamation and; b) the estimated cost of plugging and sealing each test hole.

See Attachment

I declare and affirm under the penalties of perjury that this claim (petition, application, information) has been examined by me, and to the best of my knowledge and belief, is in all things true and correct.

MINERALS & MINING PROGRAM

Dear _____:

Powertech (USA) Inc. has submitted a second Exploration Permit Application to the South Dakota Department of Environment and Natural Resources (DENR) for 30 more drill holes in select areas of the Dewey-Burdock Project area. A map of the areas for the proposed drill holes is enclosed for your review. Since this is a new application we are contacting you to ask if you have any preferences for reclamation of those drill holes that may be drilled and reclaimed on your property.

As with the previous drilling, each drill site will have a small excavated mud pit. When digging the pit the topsoil will be kept separate from the underlying clay. After drilling, the mud pit will be backfilled and the topsoil placed over the pit area and the disturbed areas seeded. The Natural Resource Conservationist for Custer and Fall River Counties has recommended a seed mixture of western wheatgrass, green needlegrass, sideoats grama, and blue grama.

You may designate your preferences for reclamation in writing, and we will submit a copy of such preferences with our application to the South Dakota Board of Minerals and Environment. You may also specify in writing reasonable restrictions regarding travel areas which will result in minimal soil erosion, and you may also specify that travel under extreme moisture conditions will be avoided.

Should you wish to provide a preference in writing, please reply to the Hot Springs address, shown above, at your earliest opportunity. Thank you for your cooperation.

Sincerely,

Frank Lichnovsky
Chief Geologist
